

Argenteo

We allow the industrialization of the supply of change kits with high productivity, minimizing bagging times.

Reduces bank handling and risk expenses in manual coins and banknotes bagging operations to attend to the supply of change kits, payroll payments, pensioners and subsidies, among others, with total control and traceability.

Ideal for cash centers of banks, CIT and industry.

It dispenses all coin and banknote denominations in the same module or kit and in a single operation depending on the configuration.

**OUR
PRODUCTS
ENABLE A MORE
EFFICIENT AND
SECURE CASH
MANAGEMENT**

- Possibility of manual feeding with access platforms or automatic feeding with Corinto conveyor belts.
- Configuration of the modules and customizable and programmable labeling.
- The times of cartridge, the cost of the cartoners, the logistics of the rolls of paper for cartridges, etc. are eliminated.
- It will deliver the kits with the configuration desired by the client.
- With 8 coin counters and 4 banknotes dispensers working in tandem, times per kit are optimized (e.g. a module of 9 bags with 500 coins and 25 banknotes in 35 seconds).
- Keeps a complete accounting of the coins and banknotes used (by dispenser, denomination, number of bags, number of batches per shift, etc.).
- Control of bagged kit by electronic scale, allowing to automatically discriminate defective kits (optional).

Argenteo's User Experience

- Intimus consolidates many years of experience in dynamic software that is completely configurable according to the operational needs of customers with different user profiles.

Remote and immediate management through **Horus**

The Horus back office platform speeds up the management of high volumes of cash, as well as of the people involved in the different places and process flows.

- Full control and traceability of all operations.
- Statistics and dashboard for machines, users, locations, companies and roles.
- Different user profiles to manage and view information depending on the assigned role, both in machines and in Horus: User, Administrative, Technician, CIT ...
- Custom configuration of roles, users, and geographic area assignments available.
- Alert management.
- Continuously evolving platform.

Specifications
