

Darico Coins

Within the Cash Deposit Darico family range is Darico Coins; secure self-service device that integrates batch acceptance into coin processing, counts and ensures the authenticity of the cash with full traceability in the different processes: Operational, Technical, CIT, among others; efficient, affordable and easy to install.

Available in Stand Alone format or integrated with Darico banknotes in Combi format.

It digitizes the information, optimizing decision-making while enabling remote management and viewing of transaction and fill-level reports.

It facilitates the online bank account deposit service.

Great features for the deposit of coins in a small, modular, safe and controlled device by allowing integration with the systems of your business or intervening companies.

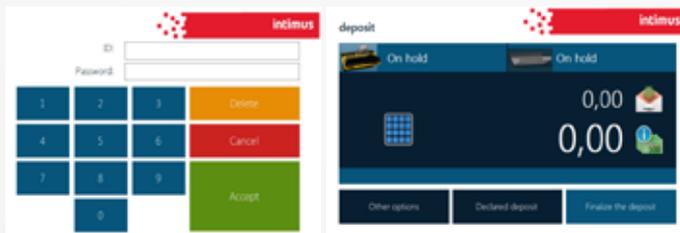

It is controlled by PC.

Darico coins eases the following processes:

- Counts and verifies each coin deposited with a speed of 300 coins per minute, rejecting suspects and storing accepted ones in a Canvas bag with a capacity of 3,000 coins inside security safe box.
- Entry of coins in batch of 50 units.
- Suitable for use both in the back office and in the front office under the counter, dividing the concentration of cash and acting as a dissuasive against possible skimming.
- Reduce errors and the possibility of skimming within cash management.
- Monitoring of all operations in real time through the HORUS back office platform.
- And much more ...
