

Tesera Evo

Payment Kiosk that combines coin and banknote acceptance with recycling, providing greater coin storage capacity. It is equipped with robust software with the greatest functional coverage and a security safe box, alarm and electronic lock.

It digitizes the information, optimizing decision-making while enabling remote management and viewing of transaction and fill-level reports.

Ideal for dealing with transactions with a high coins flow such as in financial institutions, service companies, arcades, bingo halls and casinos.

Customizable overdoor with corporate vinyl.

Possibility of extending the banknote recycling capacity by attaching the Texón module.

**OUR
PRODUCTS
ENABLE A MORE
EFFICIENT AND
SECURE CASH
MANAGEMENT**

We process, manage, reduce and eliminate cash handling in a safe and controlled manner as we are integrated with the main operating companies in the sector.

Tesera Evo eases the following processes:

- ▶ Cash exchange between banknote and coin denominations.
- ▶ Payment of prizes and cash management.
- ▶ Partial collection of the room gaming and tills.
- ▶ We manage:
 - Back office cash.
 - Balances of salon machines.
 - External collection.
- ▶ Payment of bills, balance top-ups and bank transactions.
- ▶ Possibility of integration with backend systems.
- ▶ Monitoring of all operations in real time through the HORUS back office platform.
- ▶ And much more ...

Tesera Evo's User Experience

- Intimus consolidates many years of experience in dynamic software that is completely configurable according to the operational needs of customers with different user profiles.

Remote and immediate management through Horus

Weight: 325 kg.

The Horus back office platform speeds up the management of high volumes of cash, as well as of the people involved in the different places and process flows.

- Full control and traceability of all operations.
- Statistics and dashboard for machines, users, locations, companies and roles.
- Different user profiles to manage and view information depending on the assigned role, both in machines and in Horus: User, Administrative, Technician, CIT ...
- Custom configuration of roles, users, and geographic area assignments available.
- Alert management.
- Continuously evolving platform.

Specifications													
Coin capacity	5 independent hoppers with a maximum capacity of 12,000 coins Coin recycling replicated in 2 hoppers with a capacity of 6,000 coins High speed coin counter 1,100 coins/minute												
Banknote capacity	The machine has the possibility of installing different models of recyclers and dispensers of banknotes to configure the equipment according to the features of your premises, being able to expand as room needs grow. The machine has a second banknotes acceptor installed that comes into operation when a fault occurs in the main recycler, preventing the machine from being left out of service (No stop).
