

Perfodeposit Single

Within the Cash Deposit Perfodeposit Family range is Perfodeposit Single; self-service device that integrates control and security in banknote processing with bundle acceptance, electronic lock and the possibility of installing an inking system.

It counts and ensures the authenticity of the cash with full traceability in the different processes: Operational, Technical, CIT, among others; efficient, affordable and easy to install.

It digitizes the information, optimizing decision-making while enabling remote management and viewing of transaction and fill-level reports.

It facilitates the online bank account deposit service.

Great features for banknote deposit in a smaller, lighter device with sophisticated design adapting to the customer's scenery, safe and controlled device by allowing integration with the systems of your business or intervening companies.

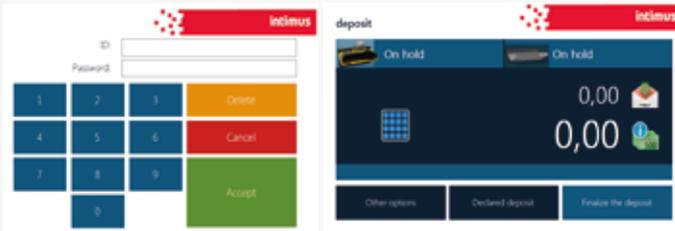

It is controlled by PC.

Perfodeposit Single eases the following processes:

- It counts and verifies each banknote deposited with a speed of 1.5 seconds per banknote, rejecting the suspicious ones and storing the accepted ones in a cassette with a capacity of 1,200 banknotes inside the safe box.
- Acceptance in bundle up to 30 banknotes and possibility of installing an inking system.
- Suitable for use both in the back office and in the front office under the counter, dividing the concentration of cash and acting as a dissuasive against possible skimming.
- Reduce errors and the possibility of skimming within cash management.
- Monitoring of all operations in real time through the HORUS back office platform.
- And much more ...
