TEXÓN

High-capacity module for the recycling of banknotes equipped with high-security safe box, electronic lock, alarm and the possibility of installing an inking system.

It improves the capacity and speed in the management of banknotes through their reuse, coupling to other Intimus equipment and with the possibility of integrating with other payment terminals and bank systems.

Ideal for dealing with transactions with a high volume of banknotes such as in financial institutions, service companies, arcades, bingo halls and casinos with high traffic of banknotes.

Customizable overdoor with corporate vinyl.

We process, manage, reduce and eliminate cash handling in a safe and controlled manner as we are integrated with the main operating companies in the sector.

Texón eases the following processes:

OUR PRODUCTS ENABLE A MORE EFFICIENT AND SECURE CASH MANAGEMENT

- Cash exchange between banknote denominations.
- Payment of prizes and cash management.
- Partial collection of the room gaming and tills.
- Payment of bills, balance top-ups and bank transactions.
- Possibility of integration with backend systems.
- Improves security by incorporating a 12mm safe with electronic lock, anti-leverage and anti-extraction systems with the possibility of installing an inking system.
- Monitoring of all operations in real time through the HORUS back office platform.
- And much more …

Texón´s User Experience

Intimus consolidates many years of experience in dynamic software that is completely configurable according to the operational needs of customers with different user profiles.

Remote management through Horus
