Spectro Banknotes

Within the Cash Deposit Spectro Family range is Spectro banknotes; self-service device with high security, storage capacity and processing speed that incorporates an Escrow system.

It counts and ensures the authenticity of the cash with full traceability in the different processes: Operational, Technical, CIT, among others; efficient, affordable and easy to install.

It digitizes the information, optimizing decision-making while enabling remote management and viewing of transaction and fill-level reports.

It facilitates the online bank account deposit service.

Great features for the deposit of banknotes in a device enabled with different security levels, modular storage capacity to Canvas bag or with Thermosealing bag and controlled device by allowing integration with the systems of your business or intervening companies.
It is controlled by PC.
Spectro banknotes eases the following processes:

- Counts and verifies each banknote deposited with a speed of 1,100 banknotes per minute, rejecting suspects and storing accepted ones in a safe box with different levels of security and storage capacity.
- Banknotes counter in bundle and Escrow system up to 200 banknotes.
- Suitable for use in the back office, dividing the concentration of cash and acting as a dissuasive against possible skimming.
- Reduce errors and the possibility of skimming within cash management.
- Monitoring of all operations in real time through the HORUS back office platform.
- And much more …

OUR PRODUCTS ENABLE A MORE EFFICIENT AND SECURE CASH MANAGEMENT
